Key facts about Springer

- Leading global scientific publisher, founded in 1842 and providing researchers in academia, scientific institutions and corporate R&D departments with quality content via innovative information products and services
- Consolidated turnover in 2013: EUR 943 million; 2012: EUR 981 million
- Some 2,200 English-language journals and more than 8,400 books published every year, in the fields of science, technology, medicine, business, transport
- Springer eBook collection with more than 175,000 titles available at link.springer.com. Springer is THE largest scientific e-book publisher
- SpringerLink, one of the leading Internet science portals, including almost 9 million documents (5.3 Mln journal articles, 3.1 Mln book chapters, 463K SpringerReference entries, 38K SpringerProtocols)
- Largest open access portfolio worldwide, with over 545 open access journals and almost 50 OA books
- 21.6% of all Nobel Prize winners are Springer authors (ALL winners of 2011 NP in medicine, physics, chemistry and economics) are Springer authors and editors

Today Springer is present in some 25 countries worldwide (7000 employees)

ORIGINAL PAPERS

Cloud computing: state-of-the-art and research challenges

Qi Zhang · Lu Cheng · Raouf Boutaba

Received: 8 January 2010 / Accepted: 25 February 2010 / Published online: 20 April 2010
© The Brazilian Computer Society 2010

Abstract Cloud computing has recently emerged as a new paradigm for hosting and delivering services over the Internet. Cloud computing is attractive to business owners as it eliminates the requirement for users to plan ahead for provisioning, and allows enterprises to start from the small and increase resources only when there is a rise in service demand. However, despite the fact that cloud computing offers huge opportunities to the IT industry, the development of cloud computing technology is currently at its infancy, with many issues still to be addressed. In this paper, we present a survey of cloud computing, highlighting its key concepts, architectural principles, state-of-the-art implementation as well as research challenges. The aim of this paper is to provide a better understanding of the design challenges of cloud computing and identify important research directions in this increasingly important area.

infrastructure providers to serve the end users. The emergence of cloud computing has made a tremendous impact on the Information Technology (IT) industry over the past few years, where large companies such as Google, Amazon and Microsoft strive to provide more powerful, reliable and cost-efficient cloud platforms, and business enterprises seek to reshape their business models to gain benefit from this new paradigm. Indeed, cloud computing provides several compelling features that make it attractive to business owners, as shown below.

No up-front investment: Cloud computing uses a pay-as-you-go pricing model. A service provider does not need to invest in the infrastructure to start gaining benefit from cloud

- Present new and original results or methods
- Advance (not repeat) scientific knowledge and enhance scientific progress
- Credibility of results
- Grant writing, research funding
- Recognition and career advancement
- Personal prestige, satisfaction and enjoyment
- Your obligation/duty as a scientist!

Why publish in English?

- The international language of science
- Other scientists **WANT** to hear from you!
- Allows you to become an effective science communicator
- To know about progress in your area

The Present

Open Access

What is Open Access?

Open Access removes price barriers

Open Access removes permission barriers

Open Access publishing is digital, online, free of charge and free of most copyright and licensing restrictions*

*Peter Suber

<http://www.earlham.edu/~peters/fos/overview.htm>

Open access to research output is becoming mandatory

The Registry of Open Access Repositories Mandatory Archiving Policies (ROARMAP) is a searchable international registry charting the growth of open access mandates adopted by universities, research institutions and research funders that require their researchers to provide open access to their peer-reviewed research article output by depositing it in an open access repository.

WILEY Open Access

Quality Open Access Research

Welcome to Wiley Open Access

Wiley is pleased to announce the launch of Wiley Open Access, a new publishing program of open access journals. Wiley Open Access journals are supported by a network of high-quality journals and societies as well as internationally-renowned editorial board members. The Wiley Open Access journals will be launching throughout 2011 and will be taking submissions soon.

Download Full Press Release (pdf)

Launching in 2011

Brain and Behavior

Edited by Andrei V. Alexandrov

Brain and Behavior is a peer-reviewed, interdisciplinary journal, providing rapid publication of high-quality research across neurology, neuroscience, psychology and psychiatry. The journal will give priority to

For Authors

- High standard, rigorous peer-review
- Quality and reputation: supported by Wiley's network of prestigious journals and societies
- Rapid publication
- Open access: freely available on Wiley Online Library and PubMed Central
- Authors retain copyright and articles are published under the Creative Commons Attribution Non Commercial License
- Fully compliant with open access mandates - meeting the requirements of funding organizations and institutions where these apply

More about Open Access funding

Armenia, Ukraine

- your country can be eligible for free publication
<http://www.springeropen.com/authors/oawaiverfund>
- institution can be a member <http://www.springeropen.com/inst/>
- <http://www.springeropen.com/funding>

How SpringerOpen can help

We work closely with librarians, institutions and funding agencies to establish affordable means through which an institution can support open access.

- [Membership Program](#)
- [Automated Article-Deposit](#)

Central funds

Funders and institutions are embracing the idea of open access funds as counterparts to library budgets, funding policies and open access initiatives. By adopting a central fund, an institution is able to reduce the barriers for their researchers wishing to publish in an open access journal.

- [What is a central fund?](#)
- [Case studies](#)

Funding open access

Developments continue to take place within the scientific arena and open access publishing has moved firmly into the mainstream. The following web pages have been created to provide institutions and researchers with information on the latest open access policies and mandates as well as open access funds created by institutions and funders from around the world and how SpringerOpen can help support open access.

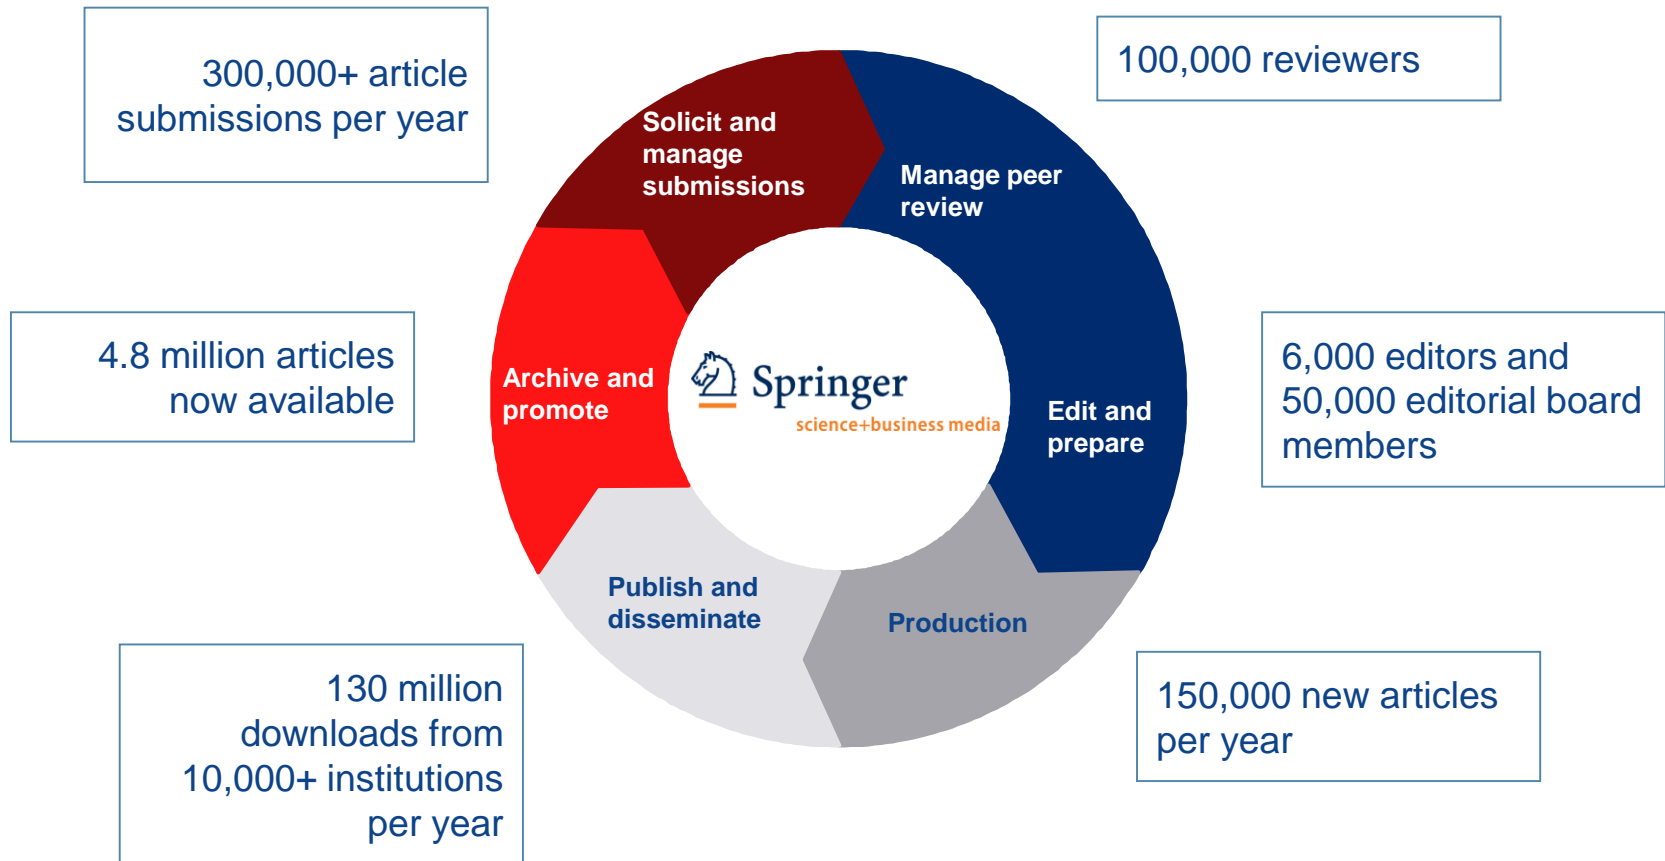

To explore your funding options at Springer, including our membership model, society sponsorships and waiver fund, please watch the video below or visit our [For authors](#) pages.

Journals

Springer's role in the journal value chain

What do journal editors want?

Good quality science!

- Topic that fits into journal's scope
- Original research
- Active research area (creates discussions and citations)
- Peer review with nice feedback
- Clear, concise writing
- Sufficient command of English language

What do authors want?

Springer Author Survey: Importance for Manuscript Submission Top 1 Box (very important; in percent)

Journal Selection

Some tips on journal selection

- Read the journal product page and READ THE JOURNAL.
- Talk to your colleagues / peers about their experiences with journals you are considering (did they get visibility and citations)
- Make use of the expertise of your Library staff.
- Is an Impact Factor important to you? Or are you more concerned about usage/visibility?
- Don't miss the importance of social networking sites.
- Join other relevant online groups and forums.
- Use the digital libraries, Abstracting & Indexing (A&I) services, Online Archives, etc.
- Check publisher sites, you can often find useful information in the 'for authors' section.
- Avoid journals with no clear submission and reviewing process

Available at

<http://www.springer.com/gp/authors-editors/journal-author>

You can also use the **Springer Journal Selector**: it helps you to find the right journal for your paper. All you need is an abstract or description of your article to find matching journals.

Enter your abstract or article description

We describe two patients who did not experience a viral rebound after cessation of HAART which was initiated for progressive disease. CD4 T-cell count remained stable in one patient and progressively declined in the other, despite apparent viral control. We failed to identify any immune activation or genetic markers that could offer an explanation for this unusual "secondary controller" status. But their viruses are clearly less fit compared to viruses from rebounders.

Find your target journal

- ☐ Only journals with an Impact Factor
- ☐ Only journals with Open Access options

Find your target journal

Available at

<http://www.springer.com/gp/authors-editors/journal-author>

We recommend the following journals

	J. Clinical Immunology	Impact Factor : 3.382	Frequency : Continuous	Model: Hybrid
	BMC Pediatrics	Impact Factor : 1.982	Frequency : Continuous	Model: Full OA

Writing research paper

How to structure your article

Title	Read first and most. Keep it short and to the point. Must reflect the content of the paper.
Authors	Correct spelling, consistency in affiliation.
Abstract	75-250 word summary of objective and results. Includes key message of paper.
Keywords	Synonyms relevant as search terms e.g. in Google. Ideally not words from title because title words are automatically keywords.
Introduction	Explain i) why the work was conducted ii) what methodology was employed iii) why you chose this particular methodology iv) How the methodology accomplished the hypothesis set out in your abstract.
Methodology	Written clearly and concisely so that someone can follow what you did.

How to structure your article (cont.)

Analysis/Results	Present the results clearly and carefully.
Discussion	Discuss the results here. If the results were not what you were expecting this is where you can provide insights or speculations as to what happened and/or what you could have done differently.
Conclusions	Write down your conclusions from the study.
Acknowledgements	Acknowledge the people and institutions who have made your research possible e.g. funding.
References	Properly cite your referenced material; use the style of the journal.
Supplementary Material	List any supplementary materials, appendices.

The 'write' order

For maximum clarity and consistency,
write your manuscript in this order:

Methods

Results

Write **during** the
research

Introduction

Discussion

Write **after** selecting
your target journal

Title

Abstract

Write last

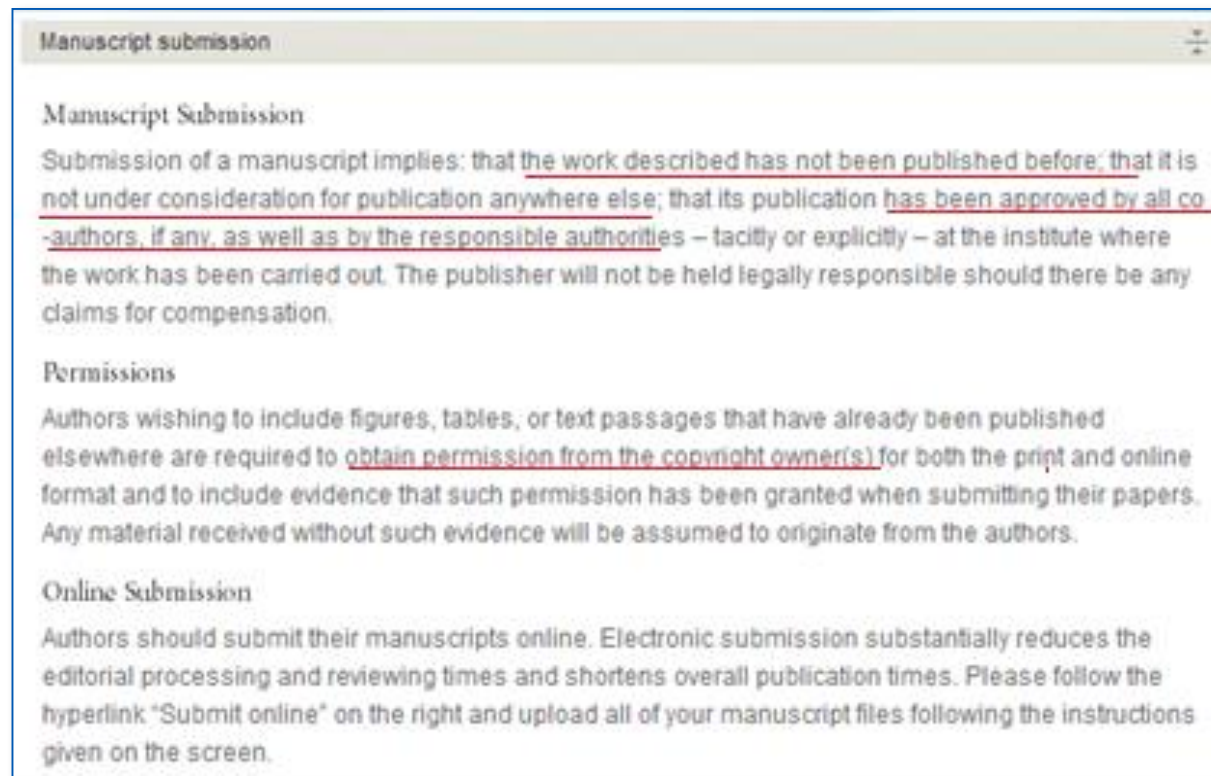

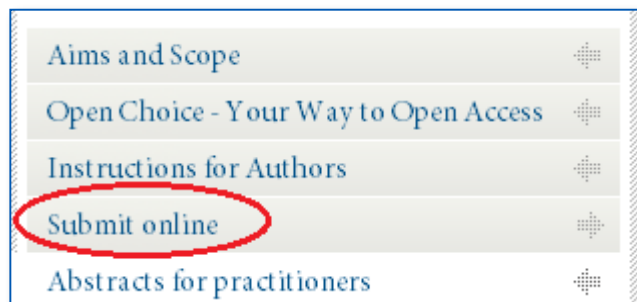

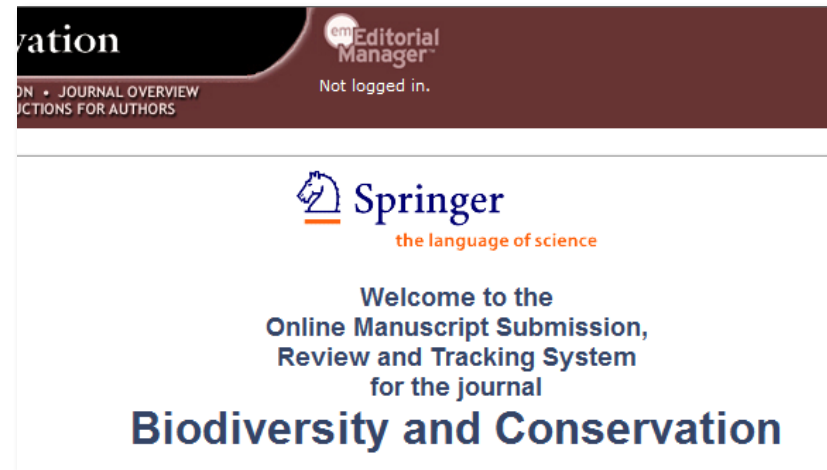

Submission and peer review

How to submit – dos and don'ts

- Do not start writing just a few days prior to the intended submission date
- Do ask your colleagues for proofreading and comments before you submit
- Do read the guidelines for the journal very carefully and make sure that you conform to these.
- Do not contact editors or EB members asking to suggest a journal, do your research on journals FIRST!
- Do prepare a cover letter which explains why you think your paper falls within the scope of the journal and which outlines the paper's originality and/or significance (if asked for in the journal's guidelines)

Submission considerations – ethics

- The work described has not been published before.
- It is not under consideration anywhere else.
- Publication has been approved by co-authors and responsible authorities.
- Permissions obtained from copyright owners.
- Plagiarism
- Data fabrication and falsification

Peer review - What is it and why is it important?

- Peer review is the process of having other experts in the field evaluate your article, your research and methodology, to determine if your paper is suitable for publication.
- Peer review is employed to maintain a high quality standard of published papers and to provide credibility.

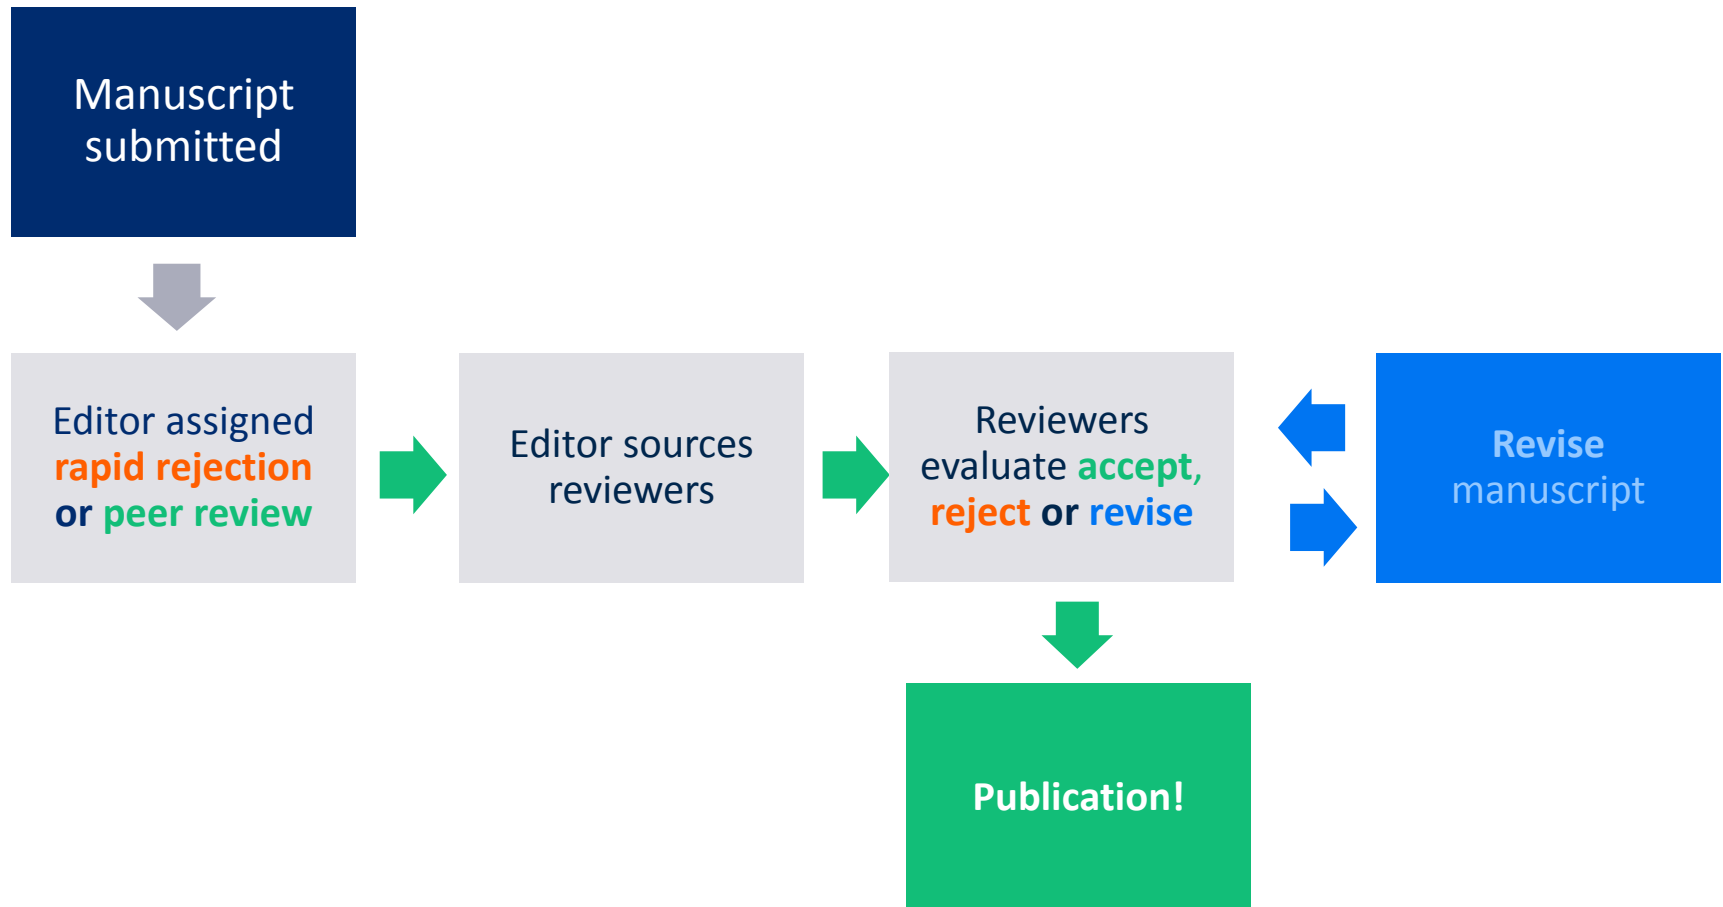

Peer review - How to deal with feedback

- Nearly every manuscript requires revisions, often two or three revisions.
- Consider peer review feedback as advice to help you improve your article.
- Address all comments carefully. Write a response letter explaining how you modified the paper to address the comments.
- Minor revision does not guarantee acceptance after revision.
- Do not be disappointed if you receive a rejection.
- Do not start arguing or fighting about review comments.
- Very few manuscripts are accepted without any form of revision
- Rejection and revision are integral to the peer review process

Publishing timeline

Submission to publication, 3–12 months

Research evaluation

Impact Factor

- There is much debate over Impact Factors in the scientific community, particularly with regard to the fairness of the system. However, there is no doubt that an Impact Factor is seen as a benchmark of quality of the journal in many academic communities.

Formula for the 2014 Impact Factor:

Number of citations in 2014 to articles published in 2012 + 2013

Total citable articles published in 2012 + 2013

Example:

120 citations in 2014 (to articles published 2012 or 2013)

----- = 1.5

80 articles published in 2012 and 2013

Impact Factor - Points to consider

- Discipline specific – does the subject lend itself to citations?
- How big is the field? What is the number of scientists who research and write in a particular area?
- Other factors influence the formula e.g. number of issues published per year
- How “hot” the topic is

Cites per Doc index (same as IF, but from Scopus)

- Source: <http://www.scimagojr.com/journalsearch.php?q=13843&tip=sid&clean=0>

How to measure quality – beyond Impact Factor

- Use Google Scholar, Microsoft Academic Search and tools based on them
 - E.g., Publish or Perish tool (GS), Rexplore (MAS)
 - <http://www.harzing.com/pop.htm>
- For journals/conferences:
 - Acceptance rate
 - Quality and duration of peer review

Other factors to consider

- Number of downloads
- Speed of publication
- Global distribution and long-term archiving

Any questions?

Open access?

Publication procedure?

Selecting a journal?

Publication ethics?

Impact factor and other metrics?

Conference proceedings ... for an author

Conferences vs journals

Pros

- Old, well-reputed conferences in computer science have higher status than many journals
- Higher visibility and greater impact – direct contact with your peers
- More timely

Cons

- Acceptance rate for top conferences is often 8-15%
- Hard deadlines and page limits. NO MAJOR REVISION
- Reviews are less detailed
- Sometimes journals value more for your promotion/funding

Conference proceedings publication

- We are looking for:
 - peer-reviewed content
 - of potential interest to international audience
 - scope: anything in computer science, but must be FOCUSED!, interdisciplinary content is also welcome
- Process (see next slides)

1. Submission of the proposal

- **Key elements of the proposal**
- Event history (for the last 3 editions)
 - number of submissions
 - number of accepted papers
 - number of participants
- Expected number of submissions/accepted papers/participants for current edition
- Topics (Call For Papers)
- Program committee
- How international the event is? OR Indicators of regional importance of the event
- Description of the review process and deadlines

2. Selecting conference proceedings series

**780 titles per year
(78% of CS titles)**

3. Evaluation

example: CCIS editorial board

1. Simone Diniz Junqueira Barbosa, PUC-Rio, Rio de Janeiro, Brazil
2. Phoebe Chen, La Trobe University, Melbourne, Australia
3. Alfredo Cuzzocrea, ICAR-CNR and University of Calabria, Italy
4. Xiaoyong Du, Renmin University of China, Beijing, China
5. Joaquim Filipe, Polytechnic Institute of Setúbal, Portugal
6. Orhun Kara, TÜBİTAK BİLGEM + Middle East Technical University, Turkey
7. Igor Kotenko, St. Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences, Russia
8. Krishna M. Sivalingam, Indian Institute of Technology Madras, India
9. Dominik Ślęzak, University of Warsaw and Infobright, Poland
10. Xiaokang Yang, Shanghai Jiao Tong University, China
11. Takashi Washio, Osaka University, Japan

4. Decision

5. Prepare files and select publication options

- Post/pre- proceedings
- Open Access (for a fee) / Subscription-based model (FREE)
- Springer provides author/editor instructions, templates
- Online Conference Service (free) for managing submissions
- Integration with EasyChair
- Upload files electronically

6. Production process

- Typesetting
- Copyediting
- Reference check
- Proofs sent to the authors for confirmation
- Authors get lifetime 33.33% discount for ordering books at www.springer.com

7. Dissemination

8. Indexing

...Not only proceedings

How to start?

- Send a proposal to

aliaksandr.birukou@springer.com

Predatory publishing

Source <http://weblog.library.tudelft.nl/wp-content/uploads/2013/02/predatory-OA-publishers-600x424.jpg>

Примерная схема работы «пиратов»

- Создать веб сайт журнала или конференции, насколько возможно красивый и внушающий доверие
 - может использоваться сходство с известным журналом / конференцией
- Массовые рассылки ученым, с предложением подачи статей
- Упор на индексирование, импакт фактор, быстрое рецензирование, а не на тему
- Статьи «рецензируются», важный момент – оплата счета за публикацию или регистрации на конференции
- Что происходит дальше?
 - В идеале, статья публикуется и индексируется
 - Конференция не обязательно проходит, или вы оказываетесь в комнате, где местный аспирант пытается организовать презентации и обсуждения статей
 - Статья и сайт могут пропасть через пару лет

Top conferences and journals do not SPAM your mailbox...

Informatics Section BMEI 2013: Deadline 30 August, Hangzhou, China [Submitting to IEEE Xplore/ISI/Ei]  

 Prof Zhou <cispbmei_cfp@cs.hznu.edu.cn>
to birukou 

Aug 27 

Dear Colleague,

will be held on Jan.04~05, 2014, Beijing, China.

ormation) and Google Book Search. DEStech
worldwide online citation of qualified papers.

Indexing vs Quality

- Getting a paper in Web of Science or Scopus should not have higher priority than publishing in a reputable venue, which brings your research to scientists in your field
- In Russia and Kazakhstan the number of publications in dubious journals is increasing
- Избегайте следующих журналов, в частности:
 - World Applied Sciences Journal
 - Life Science Journal
 - Middle East Journal of Scientific Research
 - Actual Problems of Economic

LIST OF STANDALONE JOURNALS

LIST OF PUBLISHERS

Beall's List:

Potential, possible, or probable predatory scholarly open-access publishers

This is a list of questionable, scholarly open-access publishers. We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. The criteria for determining predatory publishers are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or not to rate articles published in these journals in the context of their own institutional standards and/or geocultural locus. We emphasize that journal publishers and journals change in their business and editorial practices over time. This list is kept up-to-date to the best extent possible but may not reflect sudden, unreported, or unknown enhancements.

Advice from Matt Holland

Five things librarians can do:

- Add to the advice we already give potential authors a warning about predatory publishers.
- Remind our users (again) that the Internet is a dangerous place. Using library provided database and resources adds a level of security to the quality of the information they find.
- Be informed about current changes in publishing. Predatory publishing is a side effect of new(ish) Gold OA publishing business models.
- Be vigilant about the activities of predatory publishers. It looks like they might be here to stay. Knowing they are out there is some protection for us and our users.
- Share information with colleagues through professional networks if you identify suspect journals or publishers.

Advice from Matt Holland

Five things your users should be told:

- Never respond to unsolicited mail. Researchers may think they are great but it is unlikely that an email that begins Dear Sir/Madam has any insights to offer.
- Check the people you are dealing with are the people you think they are. It only takes a minute to check the website or read the email address.
- Use credible Open Access publishers with a track record, or established pay for view publishers with Open Access options.
- Ask your Librarian to do some research on a title for you if you are unsure or if it is new.
- Check the advice on how to spot a predatory journal.
- - See more at: <http://www.cilip.org.uk/cilip/blog/are-we-doing-enough-warn-users-about-predatory-journals#sthash.Pvyu0qLU.dpuf>

This chart shows the total number of documents per year for this query by Source Title.

Last but not the least

Books

Books vs. Journals

- Academic books have a different purpose from academic journals
- An academic book is a **complete** scholarly work on a **specific** topic
- **Book chapters** fulfill a similar role to **review articles**, with books representing a **collection** of manuscripts on related topics
- By contrast, review articles published in journals are usually **unrelated** to all of the other articles in the same issue
- Book includes large bibliography, recommended readings, summaries, exercises, index

Different types of books

- Monographs
- Edited Volume
- Textbook
- Professional Texts
- MRW – Major Reference Works
- Handbooks (Springer Reference)
- SpringerBriefs
- SpringerTheses
- Popular Science
- ...also proceedings

- I have an idea for a book...
- What type of book shall I write?
- How do I get started?

How to prepare a book proposal

- a short (3-5 pages, no special format) **description of the planned book**, its **aims & scope**, main emphasis, main **target group** (and how this group will benefit from the book), prerequisites needed to understand the book, and its **relation to other publications** in the area (if there are any).
- a **table of contents**, incl a rough page estimate and a short summary of the main chapters (like for a conference paper).
- some information about the **book authors/editors**
- if it's an edited book, a **list of contributors**, and if their contributions are already confirmed or still have to be asked for.
- some information about your intended writing **schedule**, i.e. by when you plan to make a manuscript version available for review and copy-editing.

How Springer helps you to publish a book

- Proposals are externally reviewed
- Springer provides style guides and detailed writing instructions
- Springer carries out all the typesetting, formatting, etc.
- Springer Editors guide you through the process
- Publishing with Springer is free of charge
- Complementary copies for participating authors and editors
- 33% discount on all other Springer books
- All books available as eBook and/or traditional print (POD = Print on Demand)
- eBook includes Kindle, epub, and goes to iTunes, Google Books

When you submit a book (proposal)

Submit proposal to Publishing Editor

Book proposal review

Invite authors, prepare manuscript

Submit manuscript

Editing, typesetting and formatting

Print proofs: minor changes and corrections

Book published!

What makes a good manuscript?

- Summarizes the current state of the field
- Presents various research streams in a balanced manner
- Describes the limitations of individual studies
- Provides possible developments for the field in the next 5-10 years
- Proposes research that will advance the field
- Shows a presentation style tailored to the target audience
- Includes helpful additional features like recommended reading, index, exercises, etc.
- Take home message – what this book is about, what to do with all this info

Using an editing service - Edanz

- Edanz is an external company, independent of Springer
- Using an editing service is neither a requirement nor a guarantee of acceptance for publication. Please visit their website for more information www.edanzediting.com/springer
- Edanz's expert scientific editors aim to raise your chances of acceptance and to ensure clear communication of your research
- Edanz can help you with:
 - language editing, development of your abstract and with writing an effective cover letter
 - advise on your journal selection
 - an expert scientific review of your manuscript (similar to a peer review) before you submit to your target journal
 - interpreting the peer review comments, and assess whether the changes you have made are sufficient to satisfy a peer-reviewer

Expert editors in all scientific fields

Dr Stephen Cooke

2006 – PhD Immunology, King's College, UK
Worked as a post-doctoral fellow for both the Arthritis and Rheumatism Council (ARC) and Cancer Research UK (CRUK)

Dr Conan Fee

1989 – PhD Chemical & Process Engineering, University of Canterbury, NZ
Director of Biomolecular Interactions Centre at the University of Canterbury; has published over 160 journal articles, book chapters, conference papers, and patents

William Yajima

2009 - PhD Plant Science, University of Alberta, Canada
A proteomics, molecular biology, and plant pathology expert

Dr Alison Sherwin

1992 – PhD Biochemistry, University of Kent at Canterbury, UK
Has edited over 3,000 manuscripts in the Health and Life Sciences for Japanese and Chinese authors

Dr Kristen Demarest

2000 – PhD Neurobiology and Behavior, SUNY, USA
Currently staff scientist at Scripps Research Institute

Dr Andrew Gorman

2001 – PhD Geophysics, University of British Columbia, CA
Lecturer at the Geology Department, University of Otago

Dr Natasha Lundin

2007 – PhD Chemistry, University of Otago, NZ
Cover article author in Angewandte Chemie

Richard Haase

1983 - PhD Physics, University of Canterbury, NZ
A mathematical physicist specializing in the area of symmetries in nature

Sheep Breeding Resources in Rostov Region, Russia

Kolosov Yu, L. Getmantseva and N. Shirockova

Don State Agrarian University, Rostov Reg. Russia

Submitted: Jun 26, 2013; **Accepted:** Jul 21, 2013; **Published:** Jul 28, 2013

Abstract: Sheep breeding is one of the most important sectors of agriculture providing the population with food and essential raw materials necessary for many branches of industry. In the Rostov region (Russia) sheep farming is referred to the priority sectors of agriculture. The purpose of this study is to represent sheep breeds: Salskaya, Soviet Merino and Romanovskaya (Romanov) that have been developed in the regional area and today they are the pride of Rostov region pedigree sheep breeding. The main task of sheep breeding in Rostov region is increasing the population of highly productive sheep.

Key words: Sheep • Salskaya breed • Soviet Merino breed • Romanov breed
